

Asset Integrity Management Engineers

Applus RTD Pty Ltd (formerly pndt) is a leading provider of Asset Integrity Management and Non-Destructive Testing throughout the Australasian region. We provide services to some of the major names in the resource industry and enjoy an enviable reputation for innovation and excellence in Asset Integrity Management.

Opportunities are now available for experienced ***Asset Integrity Management Engineers***.

Reporting to the Manager - Asset Integrity, the core functions of this role include:

- ✓ Assessment of plant integrity, fitness for service evaluation and provision of metallurgical consultancy support
- ✓ Development of inspection programmes using risk based inspection techniques
- ✓ In-service inspection of pressure equipment, lifting equipment and tanks and associated management of NDT activities

We are looking for people committed to the industry with a passion for perfection. You will have:

- ✓ Technical abilities and relevant qualifications
- ✓ Adequate knowledge of inspection codes criteria, Australian Standards and statutory requirements
- ✓ Demonstrate extensive skill in client liaison, project planning/co-ordination and implementation, analysis and reporting

We offer a fantastic environment where you are able to work along side industry experts who will challenge and encourage you in your career. With a generous & competitive salary available, this represents a great opportunity to make your mark in this industry.

If you would like to apply, please follow the prompts below and be sure to attach your CV and a covering letter outlining your experience and expertise.
