

# ATTAR

Advanced Technology Testing and Research

## Training Course Schedule

# 2017 - 2018

**ATTAR** Advanced Technology Testing and Research

A division of Engineering Materials Evaluation Pty Ltd ABN 14 006 554 785

Unit 1, 64 Bridge Rd, Keysborough VIC 3173. **T** (03) 9574 6144 **F** (03) 9574 6133 **E** [admin@attar.com.au](mailto:admin@attar.com.au) [www.attar.com.au](http://www.attar.com.au)

## NDT Training at an AINDT Authorised Qualifying Body

AINDT EXAMS HELD AT THE END OF ALL ISO 9712 COURSES.  
INITIAL EXAM COSTS INCLUDED IN COURSE FEES.

Satisfactory completion of an ATTAR training course is only part of the process required for attaining certification to ISO 9712. For further information on gaining or applying for certification please refer to the certification guide located on our website or the applicable certifying body. For certification purposes, ISO 9712 assumes training hours includes prior knowledge of basic mathematical skills and knowledge of materials and processes.

### Recertification

#### 10 year recertification

10 year recertification exams are available through ATTAR. Please contact us for more information or download an [Exam Request Form](#) from the ATTAR website.

#### Practical revision prior to recertification

ATTAR offers training designed to refresh/build practical skills, and in some cases, assist in gaining the required supervised industrial experience required for certification<sup>1</sup>. The training includes:

- Safe work practices for the applicable method
- Correct use, calibration and storage/maintenance of equipment
- Inspection of a variety of samples
- Evaluation of indications
- Interpretation of standards
- Reporting of results

Note1: For certification to ISO 9712, minimum requirements for supervised industrial experience must be achieved, and in some cases it may be difficult for the operator to achieve this in their workplace.

AINDT has approved ATTAR to allocate up to 5x the duration of practical training towards supervised industrial experience.  
Example: 1 week of approved practical training equates up to 5 weeks of supervised industrial experience.

### Re-sitting Exams

If you wish to re-sit and exam, you should download an [Exam Request Form](#) from the ATTAR website.

\*Prerequisites for training courses can be found on the last page of this document

Also Available - Specialised & On-Site Training, Level 3 Support Services. Additional courses are expected to run dependent upon demand.

**For further details contact our Training Team [training@attar.com.au](mailto:training@attar.com.au)**

#### IMPORTANT NOTICE

**This schedule is subject to regular updating. Please contact ATTAR prior to enrolling on your selected course, or check the latest [ATTAR course schedule online here](#).**

## Private Training Courses

ATTAR tailors private courses to suit individual program requirements, providing effective and task specific training anywhere in Australia.

### Private training

ATTAR offers a broad range of standard NDT training courses such as **PT, MT, ET, UT, RT and VT**, as well as offering more specific training courses such as

- **UT Conveyor Belts**
- **UT of Rail Welds, Wheels and Axles**
- **UT Bolts and Pins**
- **Visual Inspection of Plant & Equipment**
- **Hands on NDT for Managers and Supervisors**

Our courses can be tailored to meet the needs of your clients, your staff and your procedures.

ATTAR's private training courses can either use AINDT exams where applicable, or specific exams can be used to meet your requirements.

AINDT EXAMS HELD AT THE END OF ALL ISO 9712 COURSES.  
INITIAL EXAM COSTS INCLUDED IN COURSE FEES.

For further details contact our Training Team [training@attar.com.au](mailto:training@attar.com.au)

## Prerequisites

### Math<sup>1</sup>

Basic math skills including algebra

### # Materials Technology (Multi-Sector)

Completion of a Multi-Sector course is not compulsory. However most students without a formal background in materials technology or metallurgy may find aspects of the industry specific exams difficult without completion of the materials technology (multi-sector) course. Materials Technology (or a knowledge of materials processes) is a recommended pre-requisite for all L1 and L2 courses.

Suggested prior knowledge, enrolment & prerequisite information can be found at

[www.attar.com.au](http://www.attar.com.au)

**\* Non ISO 9712 training courses**

### Math<sup>2</sup>

Math skills including algebra and trigonometry. Examples of the typical minimum math requirements can be found on our webpage

### LL&N

All courses have a minimum prerequisite of Language, Literacy and Numeracy (LL&N), and basic knowledge of materials and processes
