# IN-SERVICE INSPECTION OF PRESSURE VESSELS

## COURSE OVERVIEW

ATTAR delivers a high quality training program into the roles, requirements and techniques of In-Service Inspection of Pressure Vessels. This course emphasises the requirements of AS/NZS 3788:2006.

### Module 1

An introduction to Non-destructive testing, with a focus on the common methods and techniques used in pressure vessel inspection. Both theoretical and practical training will be provided.

*Note: Candidates who already hold formal NDT qualifications may be **exempt from this module**.*

### Module 2

Focuses on the requirements of AS/NZS 3788:2006. Both theoretical and practical training will be provided with a focus on:

- Pressure Vessel Types and common modes of failure
- Safety devices and measures
- Inspection techniques
- Assessment and reporting
- Inspector responsibilities and administration

## COURSE DURATION

---

- Module 1: 3 Days (24 hrs)
- Module 2: 7 Days (56 hrs)

## SKILLS & BENEFITS
