

# NDT REMOTE LEARNING PROGRAM

Work patterns change, traditional classroom-based learning can be difficult to schedule. In response, ATTAR continues to evolve our existing Remote Learning Program (RLP).

ATTAR's RLP allows Technicians to learn the theory portion of their NDT course at home, work and at their own pace. Technicians are supported with regular online interactive sessions with Level 3 trainers and comprehensive course notes for easy learning and reference.

## THE COURSE

ATTAR's NDT RLP allows technicians to:

- Develop theoretical knowledge at your own pace.
- Access ATTAR's experienced Level 3 Trainers via regular scheduled interactive online Q & A sessions.
- Reduce time away from home/work.
- Consolidate theoretical knowledge in a supportive environment
- Develop practical skills in a two-stage program that combines remote and classroom-based learning.

## STAGE 1 - REMOTE

- Technicians work at their own pace through course material.
- Interactive sessions with Level 3 trainers allowing real-time Q & A, specific topic review and revision.
- Progressive assignments.
- Online assessments to confirm base knowledge.

## STAGE 2 - CLASSROOMS

- Refresh & consolidate theoretical knowledge.
- Focus on practical aspects of the module.
- Conduct ISO 9712 examinations theory and/or practical.

## NDT METHODS AVAILABLE

- Technicians work at their own pace through course material.
- Interactive sessions with Level 3 trainers allowing real-time Q & A, specific topic review and revision.
- Progressive assignments.
- Online assessments to confirm base knowledge.
